

## Application Scientist

Advanced Analytical, a manufacturer of innovative scientific instrumentation for the pharmaceutical, biotechnology and personal care markets based in Ames, IA is currently seeking an experienced **Application Scientist** to join our team. This full time dynamic position would focus on application development on our line of high throughput capillary electrophoresis (CE) systems and gels. The position would report to the Director of R&D.

Primary responsibilities would include:

- Product and application development for CE instrumentation
- Research and development of new or existing methods in our CE products
- Evaluating and adding new capabilities/components to our CE products
- Analysis of customer samples, interpreting results and writing reports
- Will work independently or as a member of a project team

Requirements:

- Ph.D. in chemistry with 3 years experience in the application of capillary electrophoresis
- Excellent oral presentation and interpersonal skills
- Strong analytical and innovative skills
- Hands-on experience with operation and maintenance of analytical instrumentation
- Strong documentation skills with high attention to detail
- Analytical, creative and problem solving skills

This position is full time with benefits. Minimal travel is required and will primarily be within the United States.
