Quality Control Scientist (Entry Level; Full Time)

Advanced Analytical, a manufacturer of innovative scientific instrumentation for the biotechnology and pharmaceutical markets, based in Ankeny, IA, is currently seeking an entry level Quality Control Scientist to join our growing team.

This full time position would focus on the performance testing of our capillary electrophoresis (CE) instrument systems and associated hardware consumables, and/or providing laboratory support to our Product Development group.

Primary responsibilities would include:

- Following detailed SOP and quality documents for performance testing of analytical instruments and associated reagents, and interpreting generated results;
- Accurately documenting and storing results in an online database;
- Performing structured studies of instruments, reagents, product shelf life and/or properties;
- General laboratory duties as needed.

Requirements:

- 2 years college minimum; preferably a BA or BS degree in biology, chemistry, biochemistry, microbiology, or molecular biology;
- Excellent verbal and written communication skills; strong documentation skills with high attention to detail;
- Ability to read and interpret documents such as safety rules, operating and maintenance instructions and procedural manuals;
- Multitasking and problem solving skills;
- A positive attitude and ability to work within a fast paced environment;
- Hands-on experience with operation and troubleshooting of analytical laboratory instrumentation highly beneficial.

This position is full time with benefits. No travel is required with this position. Please note that Advanced Analytical will not sponsor applicants for work visas associated with this position.
